

Program idea Austria

The group is greeted at the airport and heads for the city centre for an orientation tour and an exploration along the "Grand Boulevard" that features many buildings from the Austro-Hungarian monarchy. In fact, the 19th century was a troubled period. The Austro-Hungarian Empire would soon give way to a republic, the Social Democrats came to power, and Vienna was transformed. The "Ringstrasse" era was one of major public-works projects, progress and renewal, but also of a nostalgic vision of the past (historicism).

Lunch in the heart of Vienna in a typical brasserie.

Exploration of the city with the themes of Art Nouveau and Secession. On the bill: the art of living, architecture, painting, etc.

***Evening**

For this first evening, we invite you to a traditional soirée. It starts with a jaunt by historic tramway, and dinner in the village of "dance halls."

We invite you to ride to the top of the Art Nouveau Ferris Wheel (built in 1896) for one last, magnificent view of the city.

Options:

- For the gala evening, guests may wear historic Biedermeier costumes.
- Relax on the banks of the Danube: surrounded by gardens, green spaces, restaurants with riverside terraces, promenades for pedestrians and cyclists, the Old Danube is a first-rate place for incentive activities, especially for water sports.
